Key to Fine Turf - Non-Pesticides

| | |
|----------------------------|---|
| H ₂ O Placement | Placement incompatibility - the components can be physically mixed but require watering-in after application and have different application targets i.e one may be foliar, the other soil-acting. |
| | Synergistic tankmix - the two components of this tankmix provide an enhanced response when applied in the same spray. |
| TeMag Elite 1 | The product marked with a 1 should be added to the spray tank <u>first</u> . |
| H ₂ O | The two components of this tankmix require watering-in after application. |
| X | The two components of this tankmix are <u>not suitable</u> for tank-mixing. |
| Chem incomp* | Chemical incompatibility - the two components of the tankmix are antagonistic in the spray tank and may produce a precipitate. |
| N/A | Not an applicable tankmix. |

This tankmix chart represents the most up-to-date trial and field observations on the product tankmixes described above, but no warranty on their efficacy is expressed or implied.
